About

Niesenglass Switzerland GmbH is a glass manufacturing company founded by Maximilian Schlott and Jan Vyskocil. In May 2019 we opened our new workshop in Unterseen, near Interlaken, Switzerland.

We offer a range of tools and equipment for the production of hot glass, from furnaces to wooden tools. Glass producers ourselves we work hard to find solutions that are tailored to the hot glass sector and represent great value and quality.

Whether you are upgrading, fitting out a new studio or building an educational facility, we are ready to help you on your hot glass journey.

Installation, Service and Maintenance

Niesenglass offer a full installation, service and maintenance package with their equipment to ensure that your studio is running safely and efficiently.

Consultation

If you need help deciding what combination of equipment is right for your requirements Niesenglass can offer consultation and advice on the best solutions for your hot glass needs.

All prices are exclusive of tax and delivery.

All Furnaces and glass equipment are safe according to EU directives 2001/95 / EC and 2006/42 EC. Electrical standards EN 60204-1 and gas safety requirements EN 746-2.

Spare Pots – 380€ | El. Preheating set 250€

NG40 Exclusive Automat

Volume: 35kgs glass
Fuel: Propane
Pressure: 50 mmbar
Gas consuption: 1-3kgs Propane per hour

Annealer: NO
Flame Detection: YES
Flame Ignition: YES
Temperature control: YES
Control panel: YES

Price 12.500€

NG40 Exclusive

Volume: 35kgs glass
Fuel: Propane
Pressure: 50 mmbar
Gas consuption: 1-3kgs Propane per hour
Voltage: 230 V, 50 Hz

Annealer: NO
Flame Detection: YES
Flame Ignition: YES
Temperature control: NO
Control panel: YES

Price 11.000€

NG40 Basic

Volume: 35kgs glass
Fuel: Propane
Pressure: 50 mmbar
Gas consuption: 1-3kgs Propane per hour
Voltage: 230 V, 50 Hz

Annealer: NO
Flame Detection: NO
Flame Ignition: NO
Temperature control: NO
Control panel: NO

Price 9.000€

NG40 Exclusive Automat Cooling

Volume: 35kgs glass
Fuel: Propane
Pressure: 50 mmbar
Gas consuption: 1-3kgs Propane per hour
Voltage: 230 V, 50 Hz

Annealer: YES
Flame Detection: YES
Flame Ignition: YES
Temperature control: YES
Control panel: YES

Price 14.450€

NG40 Exclusive Cooling

Volume: 35kgs glass
Fuel: Propane
Pressure: 50 mmbar
Gas consuption: 1-3kgs Propane per hour
Voltage: 230 V, 50 Hz

Annealer: YES
Flame Detection: YES
Flame Ignition: YES
Temperature control: NO
Control panel: YES

Price 12.890€

NG40 Basic Cooling

Volume: 35kgs glass
Fuel: Propane
Pressure: 50 mmbar
Gas consuption: 1-3kgs Propane per hour
Voltage: 230 V, 50 Hz

Flame Ignition: NO
Temperature control: NO
Control panel: NO

Price 10.890€

Hot Glass Furnaces

NG 120 Electron

NG120 Electron is a studio pot glass furnace. With its robust construction it is excellently suited to daily glass production. It is capable of melting raw glass or shards of the highest quality. The body of the glass furnace is built in a steel frames and is delivered as one piece. The second part of the furnace is a transformer station with a furnace control panel. Clay or silica pots can be used in the oven. The furnace has a collection room for waste glass underneath. Custom made to order. Controller is operational via web enabled application.

Technical data NG120 E glass furnace:

Power:48kW Consumption:500kW / 24hr
Source of heat:9x Super Kantal 1700
Source of power:3x trafo / 3 phase
Pot size:60x40 (optional)
Dimension:180x180x220cm
Weight:3,5t
Gathering hole diameter:25cm (optional)
Electronic control: Yes

Price on request.

Additional accessories

Pipe holder: 300€
Automatic door opening sys: 3.890€
Preheating set for NG120 Natural gas serie: 4.500€

NG 120

Natural Gas Solution also available:

NG 120 AR (Automat, Recuperation) is studio pot glass furnace. With it's robust construction is predestined for daily glass production. Melting raw glass or shards is possible. Clay or silica pots can be used in the furnace. The glass furnace is built in a steel frame and is delivered as one piece. The furnace has a collection room for wasted glass underneath. Hot air recuperation system safes 10% from gas consumption. Important notice! To start the furnace you need a preheating set which is not included in the delivery.

Models available:

- NG120 Basic
- NG120 Automat
- NG120 Automat + Air recuperation (saves 10% gas)

Prices on request

Hot Glass Furnaces

Continuous belt cooling oven

Cooling belt utilises waste heat from glass furnace with support of small electrical voltage of 240V
Temp. controller: YES
Dimensions: 23 x 23 x 300 cm

Prices:

Version - manual moving belt 8.600€

Version - el. Engine, speed regulation moving belt 11.200€

Burner Systems

All burner systems are custom made to your specific requirements the below table is a price guide. Final price will be dependent on your build design.

Exclusive burner system with control panel

NG_E90 up to 90Kw	5950€
NG_E200 up to 200Kw	6950€
NG_E300 up to 300Kw	7550€

Basic burner system without control panel

NG_B90 up to 90Kw	2650€
NG_B200 up to 200Kw	3550€
NG_B300 up to 300Kw	4100€

SUMMARY HEATINGS FOR FURNACES

POWER FROM 40kW TO 300kW

1st OFFER:

BASIC HEATING

- BURNER WITH REFRACTORY BRICK
- BASIC HEATING PIPE
- FAN
- ELECTRIC SWITCH

2nd OFFER:

EXCLUSIVE HEATING

- BURNER WITH REFRACTORY BRICK
- UV DETECTOR
- ELECTRONIC IGNITION
- EXCLUSIVE HEATING PIPE
- FAN
- TWO PRESSURE SWITCH (AIR, GAS)
- SIMPLE ELECTRIC PANEL

3rd OFFER:

EXCLUSIVE HEATING WITH AUTOMATIC REGULATION

- BURNER WITH REFRACTORY BRICK
- UV DETECTOR
- ELECTRONIC IGNITION
- EXCLUSIVE HEATING PIPE
- FAN
- TWO PRESSURE SWITCH (AIR, GAS)
- THERMOCOUPLE
- ELECTRIC PANEL WITH CONTROLLER

Glory Holes

Small glory hole NG 150

Fuel: Natural gas or Propane
Manual Temperature Control
Control panel: NO
w 250 x d 200 x h 150 mm

Price: 3.500€

Glory hole NG 350 E

Fuel: Natural gas or Propane
Temperature control: YES
Control panel: YES
Safety shutoff valves: YES
Depth of camber: 65cm
Maximum Diameter of opening: 30cm
Diameter of opening in two doors:
18cm & 26cm (option to customise)

Price: 12.000 €

Glory hole NG 450 E

Fuel: Natural gas or Propane
Temperature control: YES
Control panel: YES
Safety shutoff valves: YES
Depth of camber: 65cm
Maximum Diameter of opening: 30cm
Diameter of opening in two doors: 18cm & 26cm
(option to customise)

Price: 13.500€

Hot Shop Accessories

PickUp oven NG30

Inside dimension:
300 (W) x 300 (D) x 280 (H) mm
Power: 3 kW
Temperature up to 600°C
Temperature controller

Price: 3.300€

NG800 Annealer

Custom made to order.
Price on request.

Pipe heater NG50

Opening: 500
(W) x 100 (H) mm
